

Samba Assignment - Questions and Answers

Question 1: Install Samba on your Linux system and create a shared folder named 'music-share' that is accessible from Windows machines on your local network.

Answer:

Install Samba:

```
sudo apt update
```

```
sudo apt install samba -y
```

Create Shared Folder:

```
sudo mkdir -p /srv/music-share
```

```
sudo chmod 777 /srv/music-share
```

Verify:

```
ls -ld /srv/music-share
```

Question 2: Configure Samba to allow only users 'partyuser' and 'guestuser' to access the 'music-share' folder, and set a Samba password for each user.

Answer:

Create Linux Users:

```
sudo useradd partyuser
```

```
sudo useradd guestuser
```

Set Linux Passwords:

```
sudo passwd partyuser
```

```
sudo passwd guestuser
```

Add Users to Samba:

```
sudo smbpasswd -a partyuser
```

```
sudo smbpasswd -a guestuser
```

Enable Accounts:

```
sudo smbpasswd -e partyuser
```

```
sudo smbpasswd -e guestuser
```

Question 3: Edit smb.conf to make the folder read-only for guestuser but read/write for partyuser.

Answer:

Edit Configuration File:

```
sudo nano /etc/samba/smb.conf
```

Add:

```
[music-share]
```

```
path = /srv/music-share
```

```
browseable = yes
```

```
valid users = partyuser guestuser
```

```
read list = guestuser
```

```
write list = partyuser
```

```
read only = no
```

Test Configuration:

```
testparm
```

Question 4: Connect from Windows using partyuser and copy an MP3 file into the share.

Answer:

From Windows File Explorer:
\\SERVER_IP\music-share

Login Credentials:
Username: partyuser
Password: Samba password

Copy Sample File:
song.mp3

Verify on Linux:
ls -l /srv/music-share

Expected Output:
song.mp3 appears in the shared folder.

Question 5: Restart Samba service and check connected clients using smbstatus.

Answer:

Restart Samba:
sudo systemctl restart smbd
sudo systemctl restart nmbd

Check Status:
sudo systemctl status smbd

View Connected Clients:
sudo smbstatus

Expected Result:
If a Windows client is connected, its username, IP address and open files will be displayed. If no clients are connected, the output will show no active sessions.
